Important information: Net Asset Values (NAV) and returns are stated on a cum income basis and current year unaudited. Prices quoted are mid price and performance returns are mid to mid. Performance of HICL has been combined with that of Hansa Trust PLC for periods prior to 27 August 2019. NAV performance is not the same as share price performance, and shareholders may realise returns that are lower or higher than NAV performance. The spread on products analogous to HICL typically ranges 0.5-1.5% each way on the mid-market price (Winterflood). Investors should note the market for HICL shares can be quite illiquid at times, which leads to a large spread between the buying and selling prices (i.e. the bid to offer spread). Past performance is not necessarily a guide to future performance as market and exchange rate movements may cause the value of shares and income from them to fall as well as rise, and an investor may not get back the amount invested.
